

ENERGY CONSERVATION

Declining levels of natural energy resources mandate that the school district develop and implement plans to conserve all forms of energy used in the schools. The need to participate in conserving the nation's energy resources and the economic reality of increased costs of utility services require that an energy conservation program be supported by all school district personnel.

The Board directs the superintendent to develop and implement both immediate and long-range plans designed to conserve energy resources by the school district.

Progress reports on the implementation of energy conservation measures will be made to the Board at least annually.
